A-level COMPUTER SCIENCE

Paper 2

Time allowed: 2 hours 30 minutes

Materials

For this paper you must have:

a calculator.

Instructions

- Use black ink or black ball-point pen.
- Fill in the boxes at the top of this page.
- Answer **all** questions.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- Do all rough work in this book. Cross through any work you do not want to be marked.

Information

- The marks for questions are shown in brackets.
- The maximum mark for this paper is 100.

Advice

- In some questions you are required to indicate your answer by completely shading a lozenge alongside the appropriate answer as shown.
- If you want to change your answer you must cross out your original answer as shown.
- If you wish to return to an answer previously crossed out, ring the answer you now wish to select as shown.

	Answer all questions.	Do not write outside the box
0 1.1	Describe how a 12-bit unsigned binary integer such as 010010101110 can be converted directly into hexadecimal.	
	The method you describe must not involve converting into decimal. [2 marks]	
01.2	State one reason why hexadecimal is often used in preference to binary. [1 mark]	
		3
02.1	A data communications system uses parallel data transmission.	
	Describe how parallel data transmission works. [2 marks]	

02.2	State one advantage of serial data transmission over parallel data transmissi	on. [1 mark]	Do not write outside the box
02.3	Shade one lozenge to indicate which of these statements about data commu systems is false .	nications [1 mark]	
	A For a particular communications channel, the bit rate can be higher than the baud rate.	0	
	B Latency is the rate at which signals on a wire or line can change.	0	
	The bandwidth of a transmission medium is the range of signalC frequencies that the medium can transmit without a significant reduction in signal strength.	0	
	D The greater the bandwidth of a transmission medium the higher the bit rate that can be achieved by a communication system using it.	0	
02.4	State the purpose of the start bit in asynchronous serial transmission.	[1 mark]	
02.5	State the purpose of the stop bit in asynchronous serial transmission.	[1 mark]

,

04.1	Define the term 'system software'. [1 mark]
04.2	The list below contains five types of software. Four of the types are examples of system software.
	Shade one lozenge to indicate which type of software is not system software. [1 mark]
	A Assemblers
	B Bitmap image editors
	C Interpreters
	D Libraries
	E Utility programs
04.3	Describe two functions of an operating system. [2 marks]
	Function 1
	Function 2

0 5.1	Figure 2 shows a number stored using a fixed point representation and two's complement , with six bits before and four bits after the binary point.	Do not write outside the box
	Figure 2	
	1 0 1 1 0 0 1 1	
	Convert the number in Figure 2 to decimal.	
	You should show your working. [2 marks]	
	Answer	
0 5.2	State two reasons why values stored using a floating point representation are usually stored in normalised form. [2 marks]	
	Reason 1	
	Reason 2	
	Question 5 continues on the next page	

		Do not write outside the							
	Questions 05.3 , 05.4 and 05.5 use a normalised floating point representation with an 8-bit mantissa and a 4-bit exponent, both stored using two's complement .	box							
0 5.3	Figure 3 shows a floating point representation of a number.								
	Figure 3								
	0 • 1 1 0 1 1 0 0 1 0 0 1								
	Mantissa Exponent								
	Calculate the decimal equivalent of the number.								
	Express your answer as a fraction or to 4 decimal places.								
	You should show your working.								
	[2 marks]								
	Answer								

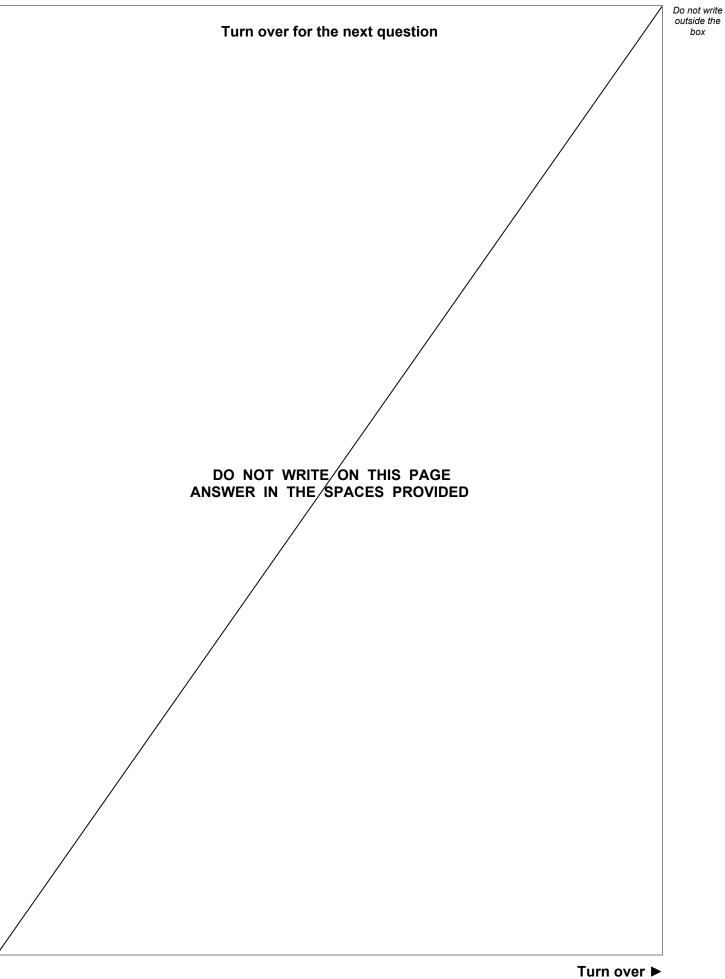

Do not write outside the box

	Questions 05.3 , 05.4 and 05.5 use a normalised floating point representation with an						
	8-bit mantissa and a 4-bit exponent, both stored using two's complement.						
0 5 . 4	Write the normalised floating point representation of the decimal value –23.25 in the boxes below.						
	You should show your working. [3 marks]						
	Answer Mantissa Exponent						
	Question 5 continues on the next page						

		Do not write
	Questions 05.3 , 05.4 and 05.5 use a normalised floating point representation with an 8-bit mantissa and a 4-bit exponent, both stored using two's complement .	outside the box
0 5.5	Figure 4 shows the closest possible representation of the decimal number –0.22558594 in this floating point system.	
	Figure 4	
	Mantissa Exponent	
	By converting this number back to decimal it can be seen that the actual value stored is –0.2265625	
	Calculate the relative error that has occurred when representing -0.22558594	
	You should show your working.	
	Express your answer as a percentage to 2 decimal places. [2 marks]	
	Answer	11

t Do not write outside the box

Supermarkets often gather information about their customers and the purchases that they make. This information can be analysed by the supermarket and other companies for a range of purposes.Some of the information is collected at the checkout, where the identity of the person is read from a loyalty or payment card using RFID (radio-frequency identification) and a barcode reader is used to identify the products being purchased.By analysing the purchases that a shopper has made, it might be possible to identify such things as whether the shopper has children, is pregnant, or lives in a house with a garden. Other types of analysis might include the amount of money a customer

Describe the principles of operation of the hardware used to collect the information **and** discuss some of the ethical and legal issues that might arise as a result of the capture and processing of this data.

spends, the times that they choose to shop at and the differences in shopping habits

of different groups of shoppers.

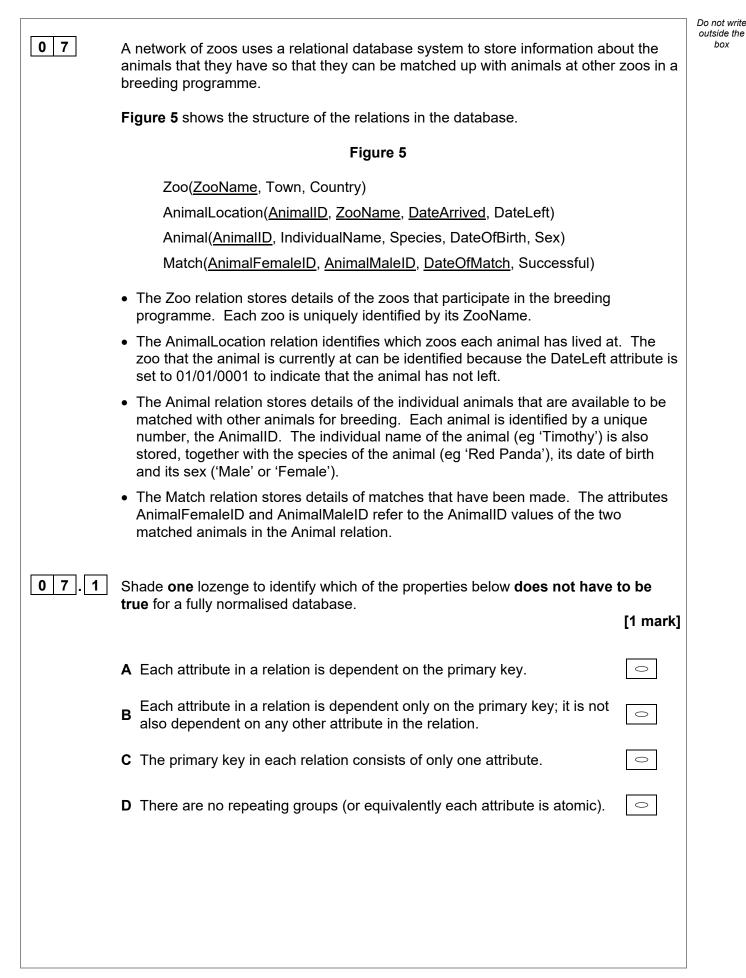

In your answer you will be assessed on your ability to follow a line of reasoning to produce a coherent, relevant and structured response.

HALT Stops the execution of the program.	HALT	

Labels: A label is placed in the code by writing an identifier followed by a colon (:). To refer to a label the identifier of the label is placed after the branch instruction.

Interpretation of <operand2>

<operand2> can be interpreted in two different ways, depending on whether the first character
is a # or an R:

• # – use the decimal value specified after the #, eg #25 means use the decimal value 25

• Rm – use the value stored in register m, eg R6 means use the value stored in register 6

The available general-purpose registers that the programmer can use are numbered 0-12

Do not write outside the

box

A digital recording was made using a sampling rate of 44 100 Hz with a 16-bit sample resolution.
A sampling rate of 1 Hz means that one sample has been taken every second.
The file, which stores only the recording, is 17.199 megabytes in size.
Calculate the duration of the recording in seconds.
You should show your working. [3 marks]
Answerseconds

IB/G/Jun22/7517/2

1 2 In a functional programming language, six functions named fu, fv, fw, fx, fy and fz and a list of temperatures in Fahrenheit named temps are defined as shown in Figure 8. Figure 8 temps = [50, 68, 95, 86]fu a = (a - 32) * 5 / 9fv b = map fu b fw[] = 0fw (x:xs) = 1 + fw (xs)fx [] = 0fx (x:xs) = x + fx (xs)fy c = fx (c) / fw (c)fz d = fy (fv (d))A temperature can be converted from degrees Fahrenheit to degrees centigrade using the following method: centigrade = (Fahrenheit – 32) $\times \frac{5}{9}$ For example, 59 degrees Fahrenheit is equivalent to 15 degrees centigrade. In the functions fw and fx: [] is the empty list • (x:xs) lets the function definition refer to the head of the list as x and the tail as xs. 1 2 . 1 Shade one lozenge to indicate which of the listed functions from Figure 8 includes a higher-order function in its definition. [1 mark] fu \bigcirc fv \bigcirc fx \bigcirc fy \bigcirc 1 2. 2 Shade two lozenges to indicate which of the listed functions from Figure 8 use recursion in their definitions. [1 mark] fw fu \circ fv \bigcirc \bigcirc fx \bigcirc
